Preface

Dear Friends,

Welcome to Class Ten. You have learnt Geography as a part of Environmental Studies from Class Three to Class Five and through the Geography textbooks of Class Six to Class Nine. It gives me immense pleasure to place the new textbook for Class X in your hands.

Many events occur around you. The engulfing nature keeps meeting you in the form of sunlight, rainfall and winter. The breeze is so pleasing to your body. You understand the explanations of such natural events through geography. Geography always tries to take you towards nature. In geography, the relationship between biotic factors and environment and interactions between various factors are studied.

You have already learnt about various basic concepts related to earth. You have understood various elements related to your daily life through this subject. You will surely benefit in the future. We have also studied about economic, social and cultural interactions in this subject.

Skills like observation, perception, critical thinking are important for this subject. Use them, nurture them . Maps, graphs, diagrams, informative boxes, tables, etc. are the means of studying this subject. Practice them to use them. An opportunity is given to you through this textbook.

The format of the textbook is such that it revises the concepts you have learnt till Class nine. During this revision, concepts learnt in earlier classes will be helpful to you. Don't forget them! A comparison of the characteristics of two countries- India and Brazil- has been presented in the textbook. You will certainly like it !

Your reviews are always taken positively. Please send them to us.

Heartiest Greetings to all of You !
